Hair Sample:

- Pull 25-50 hairs from the tail, pulling 5-10 hairs at a time.
 - DO NOT USE SHEDDED HAIRS (FROM BRUSH, ETC.)
 - Align the ends of the hairs harvested closest to the skin together, and trim sample to 3-4 inches.
 - Look for a small bulb (hair follicle) on the end of the hairs, and do not tape over follicle.
- example:

- Tape the hair sample in the middle and attach to this paper.

Please send sample and check (payable to University of Kentucky) to:
